SUBJECT INDEX

PAGE

Asteroids

The fragmentation of the asteroids, *Brian Hellyer* 383

Astrophysics

Ionization equilibria for high ions of Fe and Ni, *Carole Jordan*... 17
The calcium atom-graphite grain 4430 Å model, *H. A. J. McIntyre and D. A. Williams* ... 53
Spiral structures of disc galaxies as non-axisymmetric perturbations—II. *Shin Yabushita* ... 87
Scattering of plane electromagnetic waves by infinite concentric cylinders at oblique incidence, *G. A. Shah* 93
An electrodynamic model of radio galaxies and quasars, *J. H. Piddington* 131
Limb darkening and solar rotation—II, *H. H. Plaskett* 149
A numerical model of hydromagnetic turbulence, *D. L. Moss* 173
The SiH $A^2\Delta$–$X\Pi(0, 0)$ band in the Fraunhofer spectrum, *D. L. Lambert and E. A. Mallia* 313
Collision strengths for transitions in ions with configurations $3p^3$, *S. J. Czyak, T. K. Krueger, P. de A. P. Martins, H. E. Saraph and M. J. Seaton* 361
The energy transfer in the convective envelope of a rotating star and the solar differential rotation, *Yoji Osaki* 391
Level populations of hydrogen in gaseous nebulae, *M. Brocklehurst* 417
Fraunhofer line statistics, *C. W. Allen* 435
Non-similarity linear wave cloud collapse solutions, *Alan E. Wright* 455

Celestial mechanics

On the ideal resonance problem—II. *Alan H. Jupp* 197
Periodic solutions close to commensurabilities in the three-body problem, *A. T. Sinclair* ... 325

Galaxies

Formation of gas clouds in galactic nuclei, *T. T. Arny* 63
Spiral structures of disc galaxies as non-axisymmetric perturbations—II, *Shin Yabushita* ... 87
An electrodynamic model of radio galaxies and quasars, *J. H. Piddington* 131
The dynamics of clusters of galaxies in universes with non-zero cosmological constant, and the virial theorem mass discrepancy, *J. C. Jackson* 249

Interstellar medium

The calcium atom-graphite grain 4430 Å model, *H. A. J. McIntyre and D. A. Williams* ... 53
Formation of gas clouds in galactic nuclei, *T. T. Arny* 63
On the dynamics of self-gravitating spheres, *A. Barnes and G. J. Whitrow* 193
Non-similarity linear wave cloud collapse solutions, *Alan E. Wright* 455

Meteors

The distribution of orbit parameters and the changes in incident meteor particle flux density, *N. S. Andrianov, U. A. Pupysev and V. V. Sidorov* 227

Moon

Measurements of lunar radiation in the wavelength range centred at 1·2 mm, *P. E. Clegg and B. S. Carter* 261

Planetary (and gaseous) nebulae

Electron densities in planetary nebulae, *H. E. Saraph and M. J. Seaton* 367
Level populations of hydrogen in gaseous nebulae, *M. Brocklehurst* 417

Stars—atmospheres of

Meridional circulation in rotating stellar atmospheres, *R. Connon Smith* 275
A perturbation solution of the Milne problem, *J. J. Monaghan* 253
The energy transfer in the convective envelope of a rotating star and the solar differential rotation, *Yoji Osaki* 391

Stars—binary

A study of γ^2 velorum with a stellar intensity interferometer, *R. Hanbury Brown, J. Davis, D. Herbison-Evans and L. R. Allen* 103
Models of close and contact binary stars—I. Polytropic models, *B. R. Durney and I. W. Roxburgh* 239

Stars—cepheid variables

Photometry of bright southern Cepheids, *R. S. Stobie* 1

Stars—photometry

Photometry of bright southern Cepheids, *R. S. Stobie* 1
The calibration of narrow-band photometry—I. Cambridge observations of G and K giants, *R. A. Bell* 25
Photoelectric radial velocities of 87 seventh-magnitude K stars previously observed by Redman, *R. F. Griffin* 211

Stars—positions of

Accurate positions of 502 stars in the region of the Pleiades, *Heinrich Eichhorn, William D. Googe, Carl F. Lukac and J. Kenneth Murphy*, published in *Memoirs*, Volume 73, Part 2 ... 125

Stars—radial velocities

Photoelectric radial velocities of 87 seventh-magnitude K stars previously observed by Redman, *R. F. Griffin* 211

Stars—spectra of

Line strengths for southern OB stars—III. Balmer profiles for slow rotators, *William Buscombe* 75
Line strengths for southern OB stars—IV. Emission-line profiles, *William Buscombe* ... 79
Calcium emission intensities as indicators of stellar age, *Olin Wilson and Sir Richard Woolley* 463
The chemical composition of twelve late F dwarfs, *A. L. T. Powell* 477
Lithium in F and G type stars—I. Isotope abundances, *M. W. Feast* 489

Stars—structure and evolution of

Meridional circulation in rotating stellar atmospheres, *R. Connon Smith* 275
Calcium emission intensities as indicators of stellar age, *Olin Wilson and Sir Richard Woolley* 463

Stars—Wolf-Rayet

A study of γ^2 velorum with a stellar intensity interferometer, *R. Hanbury Brown, J. Davis, D. Herbison-Evans and L. R. Allen* 103

Sun

Limb darkening and solar rotation—II. *H. H. Plaskett* 149
The SiH $A^2\Delta$–$X^2\Pi$(o, o) band in the Fraunhofer spectrum, *D. L. Lambert and E. A. Mallia* 313
The energy transfer in the convective envelope of a rotating star and the solar differential rotation, *Yoji Osaki* 391
Fraunhofer line statistics, *C. W. Allen* 435

Universe—cosmology—relativity

Galaxy formation in the early Universe, *E. R. Harrison* 119
On the dynamics of self-gravitating spheres, *A. Barnes and G. J. Whitrow* 193
The dynamics of clusters of galaxies in universes with non-zero cosmological constant, and the virial theorem mass discrepancy, *J. C. Jackson* 249
Uniform model universes containing matter and blackbody radiation, *T. L. May and G. C. McVittie* 407
